## 1 PROBLEM

(1.56 ) Find area of the triangle with vertices at the point given in each of the following :

(i) (1 0) , (6 0) , (4 3)

## 2 SOLUTION

vertices in vector form

$$\mathbf{A} = \begin{pmatrix} 1 \\ 0 \end{pmatrix}, \mathbf{B} = \begin{pmatrix} 6 \\ 0 \end{pmatrix}, \mathbf{C} = \begin{pmatrix} 4 \\ 3 \end{pmatrix} \quad (2.0.1)$$

Here,

Draw a perpendicular line from C to AB.

$$\mathbf{P} = \begin{pmatrix} 4 \\ 0 \end{pmatrix} \quad (2.0.2)$$

Then Line CP becomes the height of the triangle

The direction vectors of AB and PC are

$$\mathbf{B} - \mathbf{A} = \begin{pmatrix} 5 \\ 0 \end{pmatrix} \quad (2.0.3)$$

$$\mathbf{C} - \mathbf{P} = \begin{pmatrix} 0 \\ 3 \end{pmatrix} \quad (2.0.4)$$

$$\mathbf{M} = (\mathbf{B} - \mathbf{A} \quad \mathbf{C} - \mathbf{P})^T \quad (2.0.5)$$

$$\mathbf{M} = \begin{bmatrix} 5 & 0 \\ 0 & 3 \end{bmatrix}$$

The area of  $\triangle ABC$  is obtained in terms of the magnitude of the determinant of the matrix  $\mathbf{M}$  in

$$\frac{1}{2} |\mathbf{M}| \quad (2.0.6)$$

$$\Delta = \frac{1}{2} \times \begin{vmatrix} 5 & 0 \\ 0 & 3 \end{vmatrix} \quad (2.0.7)$$

$$\Delta = 7.5$$

Fig. 0: triangle.
